

# Electronic Platforms

## BE series

### For filling control

#### VANZETTI SOLUTION TO AVOID OVERFILLING

*BE 150/50 FP600 with  
display and vice AIR4BIL*

The electronic platform scales of the BE series are used for weighing during the cylinder and extinguisher filling operations. The platforms are particularly suitable for use in the CO<sub>2</sub> filling stations, as they are predisposed for the installation at floor level or inside the FCD/SSW2 structure.

The BE series units permit to weigh extinguishers, cylinders or bundles during the filling operation with great precision.

The steel platform can stand heavy loads (in compliance with the maximum allowed capacity) and the digital screen displays the data relevant: empty and gross weight, as well as net weight in real time. The set-point management creates an interface with the filling units to automatically stop filling once the correct weight has been reached.

#### TECHNICAL FEATURES:

Model	BE60/20 FP600	BE150/50 FP600	BE300/100 FP600	BE2000/500 FP1500
Catalogue code	MZWE002	MZWE007	MZWE015	MZWE004
Max capacity kg	60	150	300	2000
Min. division g.	20	50	100	500
Voltage/frequency (VAC/Hz)	230/50	230/50	230/50	230/50
Overall dimensions (l x w x h) (mm)	600x600x130	600x600x130	600x600x130	1500x1500x90
Weight of the platform only (kg)	37	37	37	175

The platform of models BE 60, BE150 and BE 300 are prearranged for the installation of the cylinders vice model AIR4BIL.

#### COMPONENTS AND DEVICES:

- > Painted steel structure
- > LCD display
- > Simplified 6-key keyboard
- > 1 or 4 loading cells according to the model
- > 110 ÷ 240 Volt, 50 ÷ 60 Hz power supply
- > Zero setting for empty weight, gross weight, net weight, set-point management
- > Computer data output RS-232
- > Adjustable feet
- > Adjustable set point with electrical contact

#### STANDARD EQUIPMENT:

- > Display support
- > Frame for installation at floor level
- > Manual for use and maintenance.

#### OPTIONAL ACCESSORIES UPON REQUEST:

- > Alphanumeric 18-key keyboard
